Medical Policy

Designated Member of Staff: Head Teacher – Mrs Karen Lewis

This is the overarching Medical Policy for the school. Where pupils have a specific medical condition such as diabetes the school will have a specific 'Medical Conditions Policy' for the duration of the pupils time in the school.

Definition

Pupils' medical needs may be broadly summarised as being of two types:

- (a) Short-term affecting their participation in school activities which they are on a course of medication.
- (b) Long-term potentially limiting their access to education and requiring extra care and support (deemed special medical needs).

Rationale

LAs and schools have a responsibility for the health and safety of pupils in their care. The Health and Safety at Work Act 1974 makes employers responsible for the health and safety of employees and anyone else on the premises. In the case of pupils with special medical needs, the responsibility of the employer is to make sure that safety measures cover the needs of all pupils at the school. This may mean making special arrangements for particular pupils who may be more at risk than their classmates. Individual procedures may be required. The employer is responsible for making sure that relevant staff know about and are, if necessary, trained to provide any additional support these pupils may need. The Children and Families Act 2014, from September 2014, places a duty on schools to make arrangements for children with medical conditions. Pupils with special medical needs have the same right of admission to school as other children and cannot be refused admission or excluded from school on medical grounds alone. However, teachers and other school staff in charge of pupils have a common law duty to act in loco parentis and may need to take swift action in an emergency. This duty also extends to teachers leading activities taking place off the school site. This could extend to a need to administer medicine. The prime responsibility for a child's health lies with the parent who is responsible for the child's medication and should supply the school with information.

Aims

The school aims to:

- assist parents in providing medical care for their children;
- educate staff and children in respect of special medical needs;
- arrange training for volunteer staff to support individual pupils;
- liaise as necessary with medical services in support of the individual pupil;
- ensure access to full education if possible.
- monitor and keep appropriate records.

Entitlement

The school accepts that pupils with medical needs should be assisted if at all possible and that they have a right to the full education available to other pupils.

The school believes that pupils with medical needs should be enabled to have full attendance and receive necessary proper care and support.

The school accepts all employees have rights in relation to supporting pupils with medical needs as follows:

- choose whether or not they are prepared to be involved;
- receive appropriate training;
- work to clear guidelines;
- have concerns about legal liability;
- bring to the attention of management any concern or matter relating to supporting pupils with medical needs.
- to have responsibility for administering medication when 'confident and competent'.

Expectations

It is expected that:

- parents/guardians will normally administer medication to their children at home. Medicines should only be taken in school when essential: that is where it would be detrimental to a child's health if the medicine were not to be administered during the school day.
- parents will be encouraged to co-operate in training children to self-administer medication if this is practicable and that members of staff will only be asked to be involved if there is no alternative;
- where parents have asked the school to administer the medication for their child:
 - The school will administer medicines where a prescription has been issued and where the dosage issued is required during school hours. The prescription and dosage regime must be typed or printed clearly on the outside, the medication must be in date.
 - In consultation with parents, in rare circumstances, the school may administer non-prescription medicines where there is a clear short term reason or as part of a long term identified medical condition. The medicine must be in its original packaging with the dosage regime clearly indicated, the medication must be in date.

- that employees will consider carefully their response to requests to assist with the giving of medication or supervision of self-medication and that they will consider each request separately.
- the school will liaise with the Health Service for advice about a pupil's special medical needs, and will seek support from the relevant practitioners where necessary and in the interests of the pupil.

For children who have long term medical needs, a comprehensive Individual Healthcare Plan will form the basis of all actions. Any child with an IHP will be included in the SEND central register which is overseen by the SENCO.

Policy into Practice

There is a need for proper documentation at all stages when considering the issue of support for pupils with medical needs in school. This will be kept in the child's personal file in the admin office.

Expectations for staff medicines

- any medicines brought into school by the staff e.g. headache tablets, inhalers for personal use should be stored in an appropriate place and kept out of the reach of the pupils. Any staff medicine is the responsibility of the individual concerned and not the school.
