

Curriculum Concepts:

**Structures**  
Mechanisms (KS1)/Mechanical systems (KS2)  
Electrical Systems (KS2)  
Cooking and Nutrition  
Textiles  
Digital World (KS2)

Intended Outcomes - by the end of Key Stage 2:

Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts [for example, the home, school, leisure, culture, enterprise, industry and the wider environment].

When designing and making, pupils should be taught to:

Design - use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups. Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

Make - select from and use a wider range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing], accurately; select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

Evaluate - investigate and analyse a range of existing products; evaluate their ideas and products against their own design criteria and consider the views of others to improve their work; understand how key events and individuals in design and technology have helped shape the world

Technical knowledge - apply their understanding of how to strengthen, stiffen and reinforce more complex structures; understand and use mechanical systems in their products [for example, gears, pulleys, cams, levers and linkages]; understand and use electrical systems in their products [for example, series circuits incorporating switches, bulbs, buzzers and motors]; apply their understanding of computing to program, monitor and control their products.

Cooking - understand and apply the principles of a healthy and varied diet; prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques; understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed.

Progression of skills and knowledge			Structures		
	Rec	Rec	Year 1	Year 2	
	(Junk Modelling)	(Boats)	(Constructing windmills)	(Baby Bear's Chair)	
Skills	<b>Design</b>	-Making verbal plans and material choices. -Developing a junk model.	-Designing a junk model boat.  -Using knowledge from exploration to inform design.	-Learning the importance of a clear design criteria. -Including individual preferences and requirements in a design.	-Generating and communicating ideas using sketching and modelling. -Learning about different types of structures, found in the natural world and in everyday objects.
	<b>Make</b>	-Improving fine motor/scissor skills with a variety of materials. -Joining materials in a variety of ways (temporary and permanent). -Joining different materials together. -Describing their junk model, and how they intend to put it together.	-Making a boat that floats and is waterproof, considering material choices.	-Making stable structures from card, tape and glue. -Learning how to turn 2D nets into 3D structures. -Following instructions to cut and assemble the supporting structure of a windmill. -Making functioning turbines and axles which are assembled into a main supporting structure.	-Making a structure according to design criteria -Creating joints and structures from paper/card and tape -Building a strong and stiff structure by folding paper.
	<b>Evaluate</b>	-Giving a verbal evaluation of their own and others'	-Making predictions about, and evaluating	-Evaluating a windmill according to the design criteria, testing whether the structure is strong and	-Exploring the features of structures. -Comparing the stability of different shapes. Testing the strength of own structures.

		<p>junk models with adult support.</p> <ul style="list-style-type: none"> <li>-Checking to see if their model matches their plan.</li> <li>-Considering what they would do differently if they were to do it again.</li> <li>-Describing their favourite and least favourite part of their model.</li> </ul>	<p>different materials to see if they are waterproof.</p> <ul style="list-style-type: none"> <li>-Making predictions about, and evaluating existing boats to see which floats best.</li> <li>-Testing their design and reflecting on what could have been done differently.</li> <li>-Investigating the how the shapes and structure of a boat affect the way it moves.</li> </ul>	<p>stable and altering it if it isn't.</p> <ul style="list-style-type: none"> <li>-Suggest points for improvements.</li> </ul>	<ul style="list-style-type: none"> <li>-Identifying the weakest part of a structure.</li> <li>-Evaluating the strength, stiffness and stability of own structure.</li> </ul>
<b>Knowledge</b>	<b>Technical</b>	<ul style="list-style-type: none"> <li>-To know there are a range to different materials that can be used to make a model and that they are all slightly different.</li> <li>-Making simple suggestions to fix their junk model.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that 'waterproof' materials are those which do not absorb water.</li> </ul>	<ul style="list-style-type: none"> <li>-To understand that the shape of materials can be changed to improve the strength and stiffness of structures.</li> <li>-To understand that cylinders are a strong type of structure (e.g. the main shape used for windmills and lighthouses).</li> <li>-To understand that axles are used in structures and mechanisms to make parts turn in a circle.</li> <li>-To begin to understand that different structures are used for different purposes.</li> <li>-To know that a structure is something that has been made and put together.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that shapes and structures with wide, flat bases or legs are the most stable.</li> <li>-To understand that the shape of a structure affects its strength.</li> <li>-To know that materials can be manipulated to improve strength and stiffness.</li> <li>-To know that a structure is something which has been formed or made from parts.</li> <li>-To know that a 'stable' structure is one which is firmly fixed and unlikely to change or move.</li> <li>-To know that a 'strong' structure is one which does not break easily.</li> <li>-To know that a 'stiff' structure or material is one which does not bend easily.</li> </ul>
	<b>Additional</b>		<ul style="list-style-type: none"> <li>-To know that some objects float and others sink.</li> <li>-To know the different parts of a boat.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that a client is the person I am designing for.</li> <li>-To know that design criteria is a list of points to ensure the product meets the client's needs and wants.</li> <li>-To know that a windmill harnesses the power of wind for a purpose like grinding grain, pumping water or generating electricity.</li> <li>-To know that windmill turbines use wind to turn and make the machines inside work.</li> <li>-To know that a windmill is a structure with sails that are moved by the wind.</li> <li>-To know the three main parts of a windmill are the turbine, axle and structure.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that natural structures are those found in nature.</li> <li>-To know that man-made structures are those made by people.</li> </ul>

Progression of skills and knowledge		Structures			
		Year 3	Year 4	Year 5	Year 6
		<u>(Constructing a Castle)</u>	<u>(Pavilions)</u>	<u>n/a</u>	<u>Playgrounds</u>
Skills	Design	<ul style="list-style-type: none"> <li>-Designing a castle with key features to appeal to a specific person/purpose.</li> <li>-Drawing and labelling a castle design using 2D shapes, labelling: -the 3D shapes that will create the features - materials needed and colours.</li> <li>-Designing and/or decorating a castle tower on CAD software.</li> </ul>	<ul style="list-style-type: none"> <li>-Designing a stable pavilion structure that is aesthetically pleasing and selecting materials to create a desired effect.</li> <li>-Building frame structures designed to support weight.</li> </ul>		<ul style="list-style-type: none"> <li>-Designing a playground featuring a variety of different structures, giving careful consideration to how the structures will be used, considering effective and ineffective designs.</li> </ul>
	Make	<ul style="list-style-type: none"> <li>-Constructing a range of 3D geometric shapes using nets.</li> <li>-Creating special features for individual designs.</li> <li>-Making facades from a range of recycled materials.</li> </ul>	<ul style="list-style-type: none"> <li>-Creating a range of different shaped frame structures.</li> <li>-Making a variety of free standing frame structures of different shapes and sizes.</li> <li>-Selecting appropriate materials to build a strong structure and cladding.</li> <li>-Reinforcing corners to strengthen a structure.</li> <li>-Creating a design in accordance with a plan.</li> <li>-Learning to create different textural effects with materials.</li> </ul>		<ul style="list-style-type: none"> <li>-Building a range of play apparatus structures drawing upon new and prior knowledge of structures.</li> <li>-Measuring, marking and cutting wood to create a range of structures.</li> <li>-Using a range of materials to reinforce and add decoration to structures.</li> </ul>
	Evaluate	<ul style="list-style-type: none"> <li>-Evaluating own work and the work of others based on the aesthetic of the finished product and in comparison to the original design.</li> <li>-Suggesting points for modification of the individual designs.</li> </ul>	<ul style="list-style-type: none"> <li>-Evaluating structures made by the class.</li> <li>-Describing what characteristics of a design and construction made it the most effective.</li> <li>- Considering effective and ineffective designs.</li> </ul>		<ul style="list-style-type: none"> <li>-Improving a design plan based on peer evaluation.</li> <li>-Testing and adapting a design to improve it as it is developed.</li> <li>- Identifying what makes a successful structure.</li> </ul>
Knowledge	Technical	<ul style="list-style-type: none"> <li>-To understand that wide and flat based objects are more stable.</li> <li>-To understand the importance of strength and stiffness in structures.</li> </ul>	<ul style="list-style-type: none"> <li>-To understand what a frame structure is.</li> <li>-To know that a 'free-standing' structure is one which can stand on its own.</li> </ul>		<ul style="list-style-type: none"> <li>-To know that structures can be strengthened by manipulating materials and shapes.</li> </ul>
	Additional	<ul style="list-style-type: none"> <li>-To know the following features of a castle: flags, towers, battlements, turrets, curtain walls, moat, drawbridge and gatehouse - and their purpose.</li> <li>-To know that a façade is the front of a structure.</li> <li>-To understand that a castle needed to be strong and stable to withstand enemy attack.</li> <li>-To know that a paper net is a flat 2D shape that can become a 3D shape once assembled.</li> <li>-To know that a design specification is a list of success criteria for a product.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that a pavilion is a decorative building or structure for leisure activities.</li> <li>-To know that cladding can be applied to structures for different effects.</li> <li>-To know that aesthetics are how a product looks.</li> <li>-To know that a product's function means its purpose.</li> <li>- To understand that the target audience means the person or group of people a product is designed for.</li> <li>-To know that architects consider light, shadow and patterns when designing.</li> </ul>		<ul style="list-style-type: none"> <li>-To understand what a 'footprint plan' is.</li> <li>-To understand that in the real world, design can impact users in positive and negative ways. -</li> <li>To know that a prototype is a cheap model to test a design idea.</li> </ul>

Progression of skills and knowledge			Mechanisms/mechanical systems		
		Rec	Year 1	Year 2	Year 2
		n/a	(Make a moving picture)	(Drawbridge) (adapted Fairground Wheel)	(Making a moving monster)
Skills	Design		-Explaining how to adapt mechanisms, using bridges or guides to control the movement. • Designing a moving story book for a given audience.	-Selecting a suitable linkage system to produce the desired motion. -Designing a wheel.	-Creating a class design criteria for a moving monster. -Designing a moving monster for a specific audience in accordance with a design criteria.
	Make		-Following a design to create moving models that use levers and sliders.	-Selecting materials according to their characteristics. -Following a design brief.	-Making linkages using card for levers and split pins for pivots. - Experimenting with linkages adjusting the widths, lengths and thicknesses of card used. -Cutting and assembling components neatly.
	Evaluate		-Testing a finished product, seeing whether it moves as planned and if not, explaining why and how it can be fixed.  -Reviewing the success of a product by testing it with its intended audience.	-Evaluating different designs. -Testing and adapting a design.	-Evaluating own designs against design criteria. -Using peer feedback to modify a final design.
Knowledge	Technical		-To know that a mechanism is the parts of an object that move together. -To know that a slider mechanism moves an object from side to side. -To know that a slider mechanism has a slider, slots , guides and an object. -To know that bridges and guides are bits of card that purposefully restrict the movement of the slider.	-To know that different materials have different properties and are therefore suitable for different uses.	-To know that mechanisms are a collection of moving parts that work together as a machine to produce movement. -To know that there is always an input and output in a mechanism. -To know that an input is the energy that is used to start something working. -To know that an output is the movement that happens as a result of the input. -To know that a lever is something that turns on a pivot. -To know that a linkage mechanism is made up of a series of levers.
	Additional		-To know that in Design and technology we call a plan a 'design'.	-To know the features of a ferris wheel include the wheel, frame, pods, a base an axle and an axle holder.  -To know that it is important to test my design as I go along so that I can solve any problems that may occur.	-To know some real-life objects that contain mechanisms.

Progression of skills and knowledge		Mechanisms/mechanical systems			
		Year 3	Year 4	Year 5	Year 6
		Pneumatic toys	(Making a slingshot car)	(Pop up book)	n/a
Skills	Design	<ul style="list-style-type: none"> <li>-Designing a toy which uses a pneumatic system.</li> <li>-Developing design criteria from a design brief.</li> <li>-Generating ideas using thumbnail sketches and exploded diagrams.</li> </ul> <p>Learning that different types of drawings are used in design to explain ideas clearly.</p>	<ul style="list-style-type: none"> <li>-Designing a shape that reduces air resistance.</li> <li>-Drawing a net to create a structure from.</li> <li>-Choosing shapes that increase or decrease speed as a result of air resistance.</li> <li>- Personalising a design.</li> </ul>	<ul style="list-style-type: none"> <li>-Designing a pop-up book which uses a mixture of structures and mechanisms.</li> <li>-Naming each mechanism, input and output accurately.</li> <li>-Storyboarding ideas for a book.</li> </ul>	
	Make	<ul style="list-style-type: none"> <li>-Creating a pneumatic system to create a desired motion.</li> <li>-Building secure housing for a pneumatic system.</li> <li>-Using syringes and balloons to create different types of pneumatic systems to make a functional and appealing pneumatic toy.</li> <li>-Selecting materials due to their functional and aesthetic characteristics.</li> <li>-Manipulating materials to create different effects by cutting, creasing, folding and weaving.</li> </ul>	<ul style="list-style-type: none"> <li>-Measuring, marking, cutting and assembling with increasing accuracy.</li> <li>-Making a model based on a chosen design.</li> </ul>	<ul style="list-style-type: none"> <li>-Following a design brief to make a pop up book, neatly and with focus on accuracy.</li> <li>-Making mechanisms and/or structures using sliders, pivots and folds to produce movement.</li> <li>-Using layers and spacers to hide the workings of mechanical parts for an aesthetically pleasing result.</li> </ul>	
	Evaluate	<ul style="list-style-type: none"> <li>-Using the views of others to improve designs.</li> <li>-Testing and modifying the outcome, suggesting improvements.</li> <li>-Understanding the purpose of exploded-diagrams through the eyes of a designer and their client.</li> </ul>	<ul style="list-style-type: none"> <li>-Evaluating the speed of a final product based on: the effect of shape on speed and the accuracy of workmanship on performance.</li> </ul>	<ul style="list-style-type: none"> <li>-Evaluating the work of others and receiving feedback on own work.</li> <li>-Suggesting points for improvement.</li> </ul>	
Knowledge	Technical	<ul style="list-style-type: none"> <li>-To understand how pneumatic systems work.</li> <li>-To understand that pneumatic systems can be used as part of a mechanism.</li> <li>-To know that pneumatic systems operate by drawing in, releasing and compressing air.</li> </ul>	<ul style="list-style-type: none"> <li>-To understand that all moving things have kinetic energy.</li> <li>-To understand that kinetic energy is the energy that something (object/person) has by being in motion.</li> <li>-To know that air resistance is the level of drag on an object as it is forced through the air.</li> <li>-To understand that the shape of a moving object will affect how it moves due to air resistance.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that mechanisms control movement.</li> <li>-To understand that mechanisms can be used to change one kind of motion into another.</li> <li>-To understand how to use sliders, pivots and folds to create paper-based mechanisms.</li> </ul>	
	Additional	<ul style="list-style-type: none"> <li>-To understand how sketches, drawings and diagrams can be used to communicate design ideas.</li> <li>-To know that exploded-diagrams are used to show how different parts of a product fit together.</li> <li>-To know that thumbnail sketches are small drawings to get ideas down on paper quickly.</li> </ul>	<ul style="list-style-type: none"> <li>-To understand that products change and evolve over time.</li> <li>• To know that aesthetics means how an object or product looks in design and technology.</li> <li>-To know that a template is a stencil you can use to help you draw the same shape accurately.</li> <li>-To know that a birds-eye view means a view from a high angle (as if a bird in flight).</li> <li>-To know that graphics are images which are designed to explain or advertise something.</li> <li>-To know that it is important to assess and evaluate design ideas and models against a list of design criteria.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that a design brief is a description of what I am going to design and make.</li> <li>-To know that designers often want to hide mechanisms to make a product more aesthetically pleasing.</li> </ul>	

Progression of skills and knowledge		Electrical Systems (KS2 only)			
		Year 3	Year 4	Year 5	Year 6
		n/a	(Torches)	(Doodlers)	n/a
Skills	Design		-Designing a torch, giving consideration to the target audience and creating both design and success criteria focusing on features of individual design ideas.	-Identifying factors that could be changed on existing products and explaining how these would alter the form and function of the product. -Developing design criteria based on findings from investigating existing products. -Developing design criteria that clarifies the target user.	
	Make		-Making a torch with a working electrical circuit and switch. • Using appropriate equipment to cut and attach materials. -Assembling a torch according to the design and success criteria.	-Altering a product's form and function by tinkering with its configuration. • Making a functional series circuit, incorporating a motor. -Constructing a product with consideration for the design criteria. -Breaking down the construction process into steps so that others can make the product.	
	Evaluate		-Evaluating electrical products. -Testing and evaluating the success of a final product.	-Carry out a product analysis to look at the purpose of a product along with its strengths and weaknesses. -Determining which parts of a product affect its function and which parts affect its form. -Analysing whether changes in configuration positively or negatively affect an existing product. -Peer evaluating a set of instructions to build a product.	
Knowledge	Technical		-To understand that electrical conductors are materials which electricity can pass through. -To understand that electrical insulators are materials which electricity cannot pass through. -To know that a battery contains stored electricity that can be used to power products. -To know that an electrical circuit must be complete for electricity to flow. -To know that a switch can be used to complete and break an electrical circuit.	-To know that series circuits only have one direction for the electricity to flow. -To know when there is a break in a series circuit, all components turn off. -To know that an electric motor converts electrical energy into rotational movement, causing the motor's axle to spin. -To know a motorised product is one which uses a motor to function.	
	Additional		-To know the features of a torch: case, contacts, batteries, switch, reflector, lamp, lens. -To know facts from the history and invention of the electric light bulb(s) - by Sir Joseph Swan and Thomas Edison.	-To know that product analysis is critiquing the strengths and weaknesses of a product. -To know that 'configuration' means how the parts of a product are arranged.	

Progression of skills and knowledge		Cooking and nutrition		
		Rec	Year 1	Year 2
			<u>Fruit and Vegetables</u>	<u>Food - a balanced diet</u>
Skills	Design		-Designing smoothie carton packaging by-hand or on ICT software.	-Designing a healthy wrap based on a food combination which works well together.
	Make		-Chopping fruit and vegetables safely to make a smoothie. -Identifying if a food is a fruit or a vegetable. -Learning where and how fruits and vegetables grow.	-Slicing food safely using the bridge or claw grip. -Constructing a wrap that meets a design brief.
	Evaluate		-Tasting and evaluating different food combinations. -Describing appearance, smell and taste. -Suggesting information to be included on packaging.	-Describing the taste, texture and smell of fruit and vegetables. -Taste testing food combinations and final products. -Describing the information that should be included on a label. -Evaluating which grip was most effective.
Knowledge	Technical		<ul style="list-style-type: none"> <li>- Understanding the difference between fruits and vegetables.</li> <li>-To understand that some foods typically known as vegetables are actually fruits (e.g. cucumber).</li> <li>-To know that a blender is a machine which mixes ingredients together into a smooth liquid.</li> <li>-To know that a fruit has seeds and a vegetable does not.</li> <li>-To know that fruits grow on trees or vines.</li> <li>-To know that vegetables can grow either above or below ground.</li> <li>-To know that vegetables can come from different parts of the plant (e.g. roots: potatoes, leaves: lettuce, fruit: cucumber).</li> </ul>	<ul style="list-style-type: none"> <li>-To know that 'diet' means the food and drink that a person or animal usually eats.</li> <li>-To understand what makes a balanced diet.</li> <li>-To know where to find the nutritional information on packaging.</li> <li>-To know that the five main food groups are: Carbohydrates, fruits and vegetables, protein, dairy and foods high in fat and sugar.</li> <li>-To understand that I should eat a range of different foods from each food group, and roughly how much of each food group.</li> <li>-To know that nutrients are substances in food that all living things need to make energy, grow and develop.</li> <li>-To know that 'ingredients' means the items in a mixture or recipe.</li> <li>-To know that I should only have a maximum of five teaspoons of sugar a day to stay healthy.</li> <li>-To know that many food and drinks we do not expect to contain sugar do; we call these 'hidden sugars'.</li> </ul>

Progression of skills and knowledge		Cooking and nutrition			
		Year 3	Year 4	Year 5	Year 6
		<u>Eating seasonally</u>	<u>Adapting a recipe</u>	<u>What could be healthier?</u>	<u>n/a</u>
Skills	Design	-Creating a healthy and nutritious recipe for a savoury tart using seasonal ingredients, considering the taste, texture, smell and appearance of the dish.	• Designing a biscuit within a given budget, drawing upon previous taste testing judgements.	-Adapting a traditional recipe, understanding that the nutritional value of a recipe alters if you remove, substitute or add additional ingredients. - Writing an amended method for a recipe to incorporate the relevant changes to ingredients. -Designing appealing packaging to reflect a recipe.	
	Make	-Knowing how to prepare themselves and a work space to cook safely in, learning the basic rules to avoid food contamination. -Following the instructions within a recipe.	-Following a baking recipe, from start to finish, including the preparation of ingredients. -Cooking safely, following basic hygiene rules. -Adapting a recipe to improve it or change it to meet new criteria (e.g. from savoury to sweet).	-Cutting and preparing vegetables safely. -Using equipment safely, including knives, hot pans and hobs. -Knowing how to avoid cross-contamination. -Following a step by step method carefully to make a recipe.	
	Evaluate	-Establishing and using design criteria to help test and review dishes. -Describing the benefits of seasonal fruits and vegetables and the impact on the environment. -Suggesting points for improvement when making a seasonal tart.	-Evaluating a recipe, considering: taste, smell, texture and appearance. -Describing the impact of the budget on the selection of ingredients. -Evaluating and comparing a range of food products. -Suggesting modifications to a recipe (e.g. This biscuit has too many raisins, and it is falling apart, so next time I will use less raisins).	-Identifying the nutritional differences between different products and recipes. - Identifying and describing healthy benefits of food groups.	
Knowledge	Technical	-To know that not all fruits and vegetables can be grown in the UK. -To know that climate affects food growth. -To know that vegetables and fruit grow in certain seasons. -To know that cooking instructions are known as a 'recipe'. -To know that imported food is food which has been brought into the country. -To know that exported food is food which has been sent to another country.. -To understand that imported foods travel from far away and this can negatively	-To know that the amount of an ingredient in a recipe is known as the 'quantity.' -To know that it is important to use oven gloves when removing hot food from an oven. -To know the following cooking techniques: sieving, creaming, rubbing method, cooling. -To understand the importance of budgeting while planning ingredients for biscuits.	-To understand where meat comes from - learning that beef is from cattle and how beef is reared and processed, including key welfare issues. -To know that I can adapt a recipe to make it healthier by substituting ingredients. -To know that I can use a nutritional calculator to see how healthy a food option is. -To understand that 'cross-contamination' means bacteria and germs have been passed onto ready-to-eat foods and it happens when these foods mix with raw meat or unclean objects.	

	<p>impact the environment.</p> <ul style="list-style-type: none"><li>-To know that each fruit and vegetable gives us nutritional benefits because they contain vitamins, minerals and fibre.</li><li>-To understand that vitamins, minerals and fibre are important for energy, growth and maintaining health.</li><li>-To know safety rules for using, storing and cleaning a knife safely.</li><li>-To know that similar coloured fruits and vegetables often have similar nutritional benefits.</li></ul>			
--	--	--	--	--

Progression of skills and knowledge		Textiles		
		Rec	Year 1	Year 2
		<u>Bookmarks</u>	<u>Puppets</u>	<u>n/a</u>
Skills	Design	<ul style="list-style-type: none"> <li>• Discussing what a good design needs.</li> <li>• Designing a simple pattern with paper.</li> <li>• Designing a bookmark.</li> <li>• Choosing from available materials.</li> </ul>	-Using a template to create a design for a puppet.	
	Make	<ul style="list-style-type: none"> <li>• Developing fine motor/cutting skills with scissors.</li> <li>• Exploring fine motor/threading and weaving (under, over technique) with a variety of materials.</li> <li>• Using a prepared needle and wool to practise threading.</li> </ul>	<ul style="list-style-type: none"> <li>-Cutting fabric neatly with scissors.</li> <li>• Using joining methods to decorate a puppet.</li> <li>-Sequencing the steps taken during construction.</li> </ul>	
	Evaluate	<ul style="list-style-type: none"> <li>• Reflecting on a finished product and comparing to their design.</li> </ul>	-Reflecting on a finished product, explaining likes and dislikes.	
Knowledge	<ul style="list-style-type: none"> <li>-To know that a design is a way of planning our idea before we start.</li> <li>-To know that threading is putting one material through an object.</li> </ul>	<ul style="list-style-type: none"> <li>-To know that 'joining technique' means connecting two pieces of material together.</li> <li>-To know that there are various temporary methods of joining fabric by using staples, glue or pins.</li> <li>-To understand that different techniques for joining materials can be used for different purposes.</li> <li>-To understand that a template (or fabric pattern) is used to cut out the same shape multiple times.</li> <li>-To know that drawing a design idea is useful to see how an idea will look.</li> </ul>		

Progression of skills and knowledge		Textiles			
		Year 3	Year 4	Year 5	Year 6
		<u>Cross-Stitch &amp; Applique</u> <u>Cushions or Egyptian Collars</u>	<u>Fastenings</u>	<u>n/a</u>	<u>Waistcoats (adapted ?)</u>
<b>Skills</b>	<b>Design</b>	-Designing and making a template from an existing cushion and applying individual design criteria.	-Writing design criteria for a product, articulating decisions made. -Designing a personalised book sleeve.		-Designing a waistcoat in accordance to a specification linked to set of design criteria. -Annotating designs, to explain their decisions.
	<b>Make</b>	- Following design criteria to create a cushion or Egyptian collar. -Selecting and cutting fabrics with ease using fabric scissors. -Threading needles with greater independence. -Tying knots with greater independence. - Sewing cross stitch to join fabric. -Decorating fabric using appliqué. -Completing design ideas with stuffing and sewing the edges (Cushions) or embellishing the collars based on design ideas (Egyptian collars).	-Making and testing a paper template with accuracy and in keeping with the design criteria. -Measuring, marking and cutting fabric using a paper template. - Selecting a stitch style to join fabric, working neatly by sewing small, straight stitches. -Incorporating fastening to a design		-Using a template when cutting fabric to ensure they achieve the correct shape. -Using pins effectively to secure a template to fabric without creases or bulges. -Marking and cutting fabric accurately, in accordance with their design. -Sewing a strong running stitch, making small, neat stitches and following the edge. -Tying strong knots. -Decorating a waistcoat, attaching features (such as appliqué) using thread. - Finishing the waistcoat with a secure fastening (such as buttons). -Learning different decorative stitches. • Sewing accurately with evenly spaced, neat stitches.
	<b>Evaluate</b>	-Evaluating an end product and thinking of other ways in which to create similar items.	-Testing and evaluating an end product against the original design criteria. -Deciding how many of the criteria should be met for the product to be considered successful. - Suggesting modifications for improvement. -Articulating the advantages and disadvantages of different fastening types.		-Reflecting on their work continually throughout the design, make and evaluate process.
<b>Knowledge</b>	-To know that applique is a way of mending or decorating a textile by applying smaller pieces of fabric to larger pieces. -To know that when two edges of fabric have been joined together it is called a seam. -To know that it is important to leave space on the fabric for the seam. -To understand that some products are turned inside out after sewing so the stitching is hidden	-To know that a fastening is something which holds two pieces of material together for example a zipper, toggle, button, press stud and Velcro. - To know that different fastening types are useful for different purposes. -To know that creating a mock up (prototype) of their design is useful for checking ideas and proportions.		-To understand that it is important to design clothing with the client/ target customer in mind. -To know that using a template (or clothing pattern) helps to accurately mark out a design on fabric. -To understand the importance of consistently sized stitches.

		Year 3	Year 4	Year 5	Year 6
		(Electronic Charm)	n/a	n/a	(Navigating the World)
Skills	Design	<ul style="list-style-type: none"> <li>-Problem solving by suggesting potential features on a Micro: bit and justifying my ideas.</li> <li>-Developing design ideas for a technology pouch.</li> <li>-Drawing and manipulating 2D shapes, using computer-aided design, to produce a point of sale badge.</li> </ul>			<ul style="list-style-type: none"> <li>-Writing a design brief from information submitted by a client.</li> <li>-Developing design criteria to fulfil the client's request.</li> <li>-Considering and suggesting additional functions for my navigation tool.</li> <li>-Developing a product idea through annotated sketches.</li> <li>-Placing and manoeuvring 3D objects, using CAD.</li> <li>-Changing the properties of, or combining one or more 3D objects, using CAD.</li> </ul>
	Make	<ul style="list-style-type: none"> <li>-Using a template when cutting and assembling the pouch.</li> <li>-Following a list of design requirements. • Selecting and using the appropriate tools and equipment for cutting, joining, shaping and decorating a foam pouch.</li> <li>-Applying functional features such as using foam to create soft buttons.</li> </ul>			<ul style="list-style-type: none"> <li>-Considering materials and their functional properties, especially those that are sustainable and recyclable (for example, cork and bamboo).</li> <li>- Explaining material choices and why they were chosen as part of a product concept.</li> <li>-Programming an N,E, S, W cardinal compass.</li> </ul>
	Evaluate	<ul style="list-style-type: none"> <li>-Analysing and evaluating an existing product.</li> <li>-Identifying the key features of a pouch.</li> </ul>			<ul style="list-style-type: none"> <li>-Explaining how my program fits the design criteria and how it would be useful as part of a navigation tool.</li> <li>-Developing an awareness of sustainable design. • Identifying key industries that utilise 3D CAD modelling and explaining why.</li> <li>-Describing how the product concept fits the client's request and how it will benefit the customers.</li> <li>-Explaining the key functions in my program, including any additions.</li> <li>-Explaining how my program fits the design criteria and how it would be useful as part of a navigation tool.</li> <li>-Explaining the key functions and features of my navigation tool to the client as part of a product concept pitch.</li> <li>-Demonstrating a functional program as part of a product concept pitch.</li> </ul>
Knowledge	Technical	<ul style="list-style-type: none"> <li>-To understand that, in programming, a 'loop' is code that repeats something again and again until stopped.</li> <li>-To know that a Micro:bit is a pocket-sized, codeable computer.</li> </ul>			<ul style="list-style-type: none"> <li>-To know that accelerometers can detect movement.</li> <li>-To understand that sensors can be useful in products as they mean the product can function without human input</li> </ul>
	Additional	<ul style="list-style-type: none"> <li>-To know what the 'Digital Revolution' is and features of some of the products that have evolved as a result.</li> <li>-To know that in Design and technology the term 'smart' means a programmed product.</li> <li>-To know the difference between analogue and digital technologies.</li> <li>-To understand what is meant by 'point of sale display.'</li> <li>-To know that CAD stands for 'Computer-aided design'.</li> </ul>			<ul style="list-style-type: none"> <li>-To know that designers write design briefs and develop design criteria to enable them to fulfil a client's request.</li> <li>- To know that 'multifunctional' means an object or product has more than one function.</li> <li>-To know that magnetometers are devices that measure the Earth's magnetic field to determine which direction you are facing.</li> </ul>
